

Get Started with AI. Quickly and Securely.

Lunch & Learn Roadshow

Your employees are already using AI.

In a recent analysis, 35 employees across a single organization collectively submitted over 4,000 queries to AI tools in a 30-day period, many using free, unsecured platforms. The question for business leaders is no longer whether AI is entering your organization. It is whether you have a plan for it.

Join NetGain Technologies for an exclusive, in-person Lunch & Learn in your city. We will walk through how businesses like yours are addressing AI security risks, building an adoption framework, and getting real results, without overcomplicating it.

What You Will Learn

- Why shadow AI is a security and compliance risk for your business
- How to evaluate AI use cases using a Crawl, Walk, Run framework
- What it looks like to give your team access to 50+ AI models in one secure, managed platform
- How to build no-code AI workflows without relying on developers
- Real examples of time savings and productivity gains from organizations like yours

Why This Matters

The risks of unmanaged AI are real.

- Sensitive company and client data can be exposed through free AI tools
- Inconsistent usage creates compliance gaps under HIPAA, SOC 2, and other frameworks
- Without a structured approach, AI adoption stalls and the value never gets realized

This session is designed to give you a clear path forward, whether you are just starting or looking to formalize what is already happening in our organization.

Lexington, KY

August 11

Cincinnati, OH

August 13

Little Rock, AR

August 5

Louisville, KY

August 12

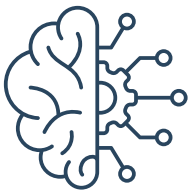

Chattanooga, TN

August 18

*Each event is limited to a small group of attendees to keep the conversation focused and relevant.
Lunch is on us.*

Session Agenda

Welcome	Introductions and a look at how AI is already showing up in organizations like yours
The Risk Reality	Shadow AI, data exposure, and what governance needs to look like in 2026
The Adoption Framework	A practical Crawl, Walk, Run model for prioritizing AI use cases by impact and readiness
Meet Hatz AI	A live demo of the secure AI platform that centralizes 50+ models, enables no-code workflows, and gives you full visibility into usage
Q&A	Open discussion with your peers and the NetGain team

Who Should Attend?

- CEOs, CFOs, COOs, and CIOs
- IT Directors and Technology Decision-Makers
- Business owners evaluating AI tools and managed IT services
- Operations leaders looking to improve team productivity

Best suited for organizations with 25 to 125 employees in financial services, manufacturing, and professional services.
